

Best Performing Option

The North Connacht 110 kV Project is now at the end of Step 4 of our six-step process. Following continued engagement with communities, local landowners, relevant agencies and completion of further studies, we can confirm the best performing route option for the North Connacht 110 kV underground electricity cable.

The 110 kV underground cable circuit route runs from Moy 110 kV Substation in Ballina Co. Mayo to Tonroe 110 kV Substation in Ballaghaderreen Co. Roscommon. It is approximately 60 km in length. It bypasses major towns and villages such as Ballina, Foxford and Ballaghaderreen.
